

Participant Characterization Form

Survey: "TEL-IoT: Template to Elicit IoT Software System Requirements"

Dear Sir, the form below will be used to understand how familiar you are with eliciting software requirements and the Internet of Things.

1. Academic background:

- a) Software Engineering
- b) Information systems
- c) Computer engineering
- d) Systems Analysis and development
- e) Other...

2. What is your experience with Software Engineering?

- a) No action in the area
- b) I studied in class or book
- c) I practiced on projects only in the classroom
- d) I practiced 1 year or more in industrial projects

3. What is your experience in software development?

- a) No action in the area
- b) Less than a year
- c) I participated in projects only in the classroom
- d) I participated in industrial projects for 1 year or more

4. What is your experience with Requirements Elicitation?

- a) No notion or just use of 1 technique
- b) I participated in projects only in the classroom
- c) I have notions of using one or more elicitation techniques
- d) I participated in industrial projects for 1 year or more

5. How much do you know about IoT software systems development?

- a) Not familiar with the area
- b) Low familiarity with the area
- c) Average familiarity with the area
- d) High familiarity with the area
